## RAPID FLATTING

Quick-drying gloss-transparent varnish for wood

### DESCRIPTION

RAPID FLATTING is a quick-drying product with a gloss transparent effect, designed for painting interior and exterior wooden items.

The product, based on synthetic resins and nitrocellulose, offers good expansion and fullness.

RAPID FLATTING emphasizes the natural beauty of wood grain, following the structural variations, typical of the material.

### APPLICATION

#### NEW WOOD SURFACES:

- Sand to remove any raised wood flakes.
- The substrate has to be well prepared and suitable for coating, so make sure the wood is not damp.
- Level out imperfections with PASTA STUCCO.
- Sand the grouting and then eliminate dust deposits.
- After 6-12 hours, proceed with the support impregnation treatment using IMPRELEGNO or IMPRECOLOR.
- Lightly sand the surface and apply with brush or spray, 1 or 2 coats of RAPID FLATTING, which has to be thinned up with DILUENTE SINTETICO or DILUENTE NITRO, in the following percentages: approx 5 -10%.

#### Pre-PAINTED WOOD SURFACES:

- Verify the condition of the old paint. Scrape off any loose flaking and poorly adhering coating.
- Proceed as for the new wood surfaces from second point onwards
