IMPRELEGNO

IMPRELEGNO is an transparent anti-woodworm and fungicide impregnating agent of wooden supports

DESCRIPTION

IMPRELEGNO is a transparent woodworm and fungicide impregnating for the protection and preparation of wooden supports that will then be treated with a FLATTING finish.

Its composition based on synthetic acrylic resins, gives the product an excellent absorbency power, necessary for the protection from atmospheric agents.

IMPRELEGNO represents for the wooden support a product protected by ultraviolet rays as it allows the application outside.

IMPRELEGNO remains unchanged in time despite the natural structural variations of the wood.
