

VELUS PERLATO

Decorative finish with silver effects

DESCRIPTION

VELUS PERLATO is a delicate decorative coating, with silver effects, able to illuminate the decorated environment. Ideal for environments where a particular elegant coating with washable properties is required. In fact, VELUS PERLATO is a super-washable decorative and can also be applied outdoors. The product is available in GOLD and SILVER base.

APPLICATION

- The surface to be treated must be dry. Conditions and thickness of the plaster layer affect the drying and hardening time, so make sure it has at least 28 days of curing time, depending on temperature.
- The substrate has to be well prepared and suitable for coating: dry plaster, not any granules from plaster. In case of old walls make sure there is no poor or dusty paint: remove them if necessary as well as flaking paint.
- Apply 1 coat of SCIK PURAL ACRIL insulation if necessary.
- Apply with a brush or roller, one or two coats of DECOR FONDO SHINY, eventually colored, which has to be thinned up to 5-10 % with water. Allow to dry perfectly (from 6 to 12 hours).
- Choose the desired color from the color chart and proceed to the product coloration through the tintometer.
- Immediately after, since the applied product is still fresh, dab the entire surface with the FRACTONE VELATURA (trowel velatura) tool.
- Allow to dry to appreciate the effect.
